

Applying the Exclusive Design Features of the Black Rhodium's Most Advanced Loudspeaker Cable

The Harmony Stereo Interconnect

Black Rhodium Announces The Launch Of The Harmony Stereo Interconnect.

HARMONY is a new stereo interconnect cable designed to achieve high sound quality by using the latest Black Rhodium high end cable technology.

HARMONY is hand built at the Black Rhodium factory in Derby to employing advanced design techniques developed by Black Rhodium for use in its most expensive products.

The special design features of **HARMONY** include:

- Ultra low 'Proximity Effect' Magnetic Field distortion due to added inter-conductor distance due to attractive braid over conductor
- Low loss silicone rubber insulation for low dielectric absorption
- Very good flexibility
- Mechanical Vibration Suppression Materials used in Construction
- RFI noise reduction technology
- Gold plated 'Hourglass Silhouette' RCA plugs

Low Loss Silicone Rubber Insulation Reduces Time Smeared Distortion.

The wires in **HARMONY** are insulated in silicone rubber because its low dielectric loss ensures extremely low distortion due to dielectric absorption effects in which sound energy is absorbed in the insulation and released at a later interval of time to create highly audible time-smearing distortion.

Ultra Low Transient Phase Distortion through Innovative Design.

HARMONY gives a very clear diction of a singer's voice and separates musical instruments superbly through a dramatic reduction of 'Transient Phase Distortion'.

'Transient Phase Distortion' is reduced by using thicker insulation than is usual in speaker cables, increasing the distance between conductors and thereby reducing the magnetic field seen in each conductor wire as a result of the magnetic field created by the current in the other conductor wire. A further increase in the distance between conductors is achieved by use of the attractive cable braid and this further reduces 'Proximity Effect' distortion.

By very substantially reducing this form of distortion, the music becomes clearer and more dynamic, with greater ambience and experience of the music's emotional qualities.

Mechanical Vibration Damping Materials

Construction of **HARMONY** includes the use of two separate and complementary materials that effectively damp Mechanical Vibrations within the cable without the expense of Vibration Stabilisers.

Anti RFI / EMI Technology to Further Reduce Distortion.

HARMONY uses RFI suppression technology originally development for high end cables in its construction. This protects the signal wires from picking up radio frequency interference (RFI) generated from Radio, Wi-Fi, Mobile Phones and even central heating systems.

The result is less audible distortion allowing cleaner, clearer sounds to be enjoyed from your equipment.

Anti RFI / EMI Technology to Further Reduce Distortion.

HARMONY is covered in a tightly braided screen to protect the inner cores from picking up radio frequency interference (RFI) generated from Radio, Wifi, Mobile Phones and even central heating systems.

This reduces the amount of audible distortion in the cable, allowing cleaner, clearer sounds to be enjoyed from your equipment.

High End Gold Plated Connectors

HARMONY RCA fitted cables are terminated with high quality 'Hourglass Silhouette' RCA connectors, plated in gold for long life reliability. The shape of the connector bodies enables easy insertion and removal at the back of equipment.

Specification of Black Rhodium Harmony

- Capacitance of 1m terminated cable: 50pF

Best Results from *HARMONY*

We recommend the use of either **FOXTROT** or **QUICKSTEP** Loudspeaker Cables to enjoy the best musical results when using *HARMONY*

Harmony Stereo interconnects will be available at these Retail Prices:

0.5m pair terminated with GN-3 RCA plugs. £320.00

1.0m pair terminated with GN-3 RCA plugs. £370.00

3m Sub-Woofer cable terminated with GN-3 RCA plugs £300.00

5m Sub-Woofer cable terminated with GN-3 RCA plugs £400.00

High resolution images of *HARMONY* can be obtained on request from Black Rhodium. Samples of *HARMONY* cable for review can be obtained by contacting Black Rhodium.

Notes for Editors.

Black Rhodium is a British cable manufacturer that champions the use of British manufactured cables in (almost all) its audio products.

Black Rhodium cables use the very highest quality materials including precious metals in its range of cables.

Black Rhodium exports British made cables to 25 different overseas countries
