

Black Rhodium

Power Management DCT

Black Rhodium Power Management black is a high quality high current electrical filter and distribution system with 8 separate socket outlets.

Black Rhodium's power management is an ideal way to create clean crisp images and sounds, whilst also protecting your valuable cherished equipment from excessive voltages.

Features and benefits include:

- ✓ Supplied with 2m of our Jazz Super Mains cable, which is also used for the blocks internal wiring. This offers superior RFI rejection through the internal twisting of the wire, as well as superior conductivity and contact, due to the silver plated wire. On top of this, the cable goes through our exclusive post curing process, enhancing smoothness, and cleanliness of audio and visual.
- ✓ Advanced quality control of the direction of wiring during the production process, delivering superior stereo imaging, as well as lower background noise.
- ✓ 8 easy to use inlets, ensuring you have plenty of accommodation for all your equipment's power sources
- ✓ Two stage filtering, reducing noise and offering a cleaner electrical supply to offer a more natural dynamic sound, and sharper images from visual equipment through noise free pictures
- ✓ Voltage Dependant Resistor (VDR) filtering, ensuring that equipment remains safe, whatever the usage
- ✓ Deep Cryogenically Treated, adding improvements to depth, clarity and timing of audio and visual.
- ✓ Available with UK 13A, USA or European Schuko terminations
- ✓ Manufactured in England, ensuring that we have close, face-to-face contact with the manufacturing and production facilities, and also shows that we support and are proud of British manufacturing.
