

Black Rhodium

Prelude

The Prelude is a high quality interconnect designed for use in high quality systems or as an upgrade to existing systems due to its excellent sound quality:

- ✓ Silver plated copper 19x0.25mm² stranded conductors, delivering improved clarity to middle and high frequencies, whilst also delivering strong bass and natural balances.
- ✓ High quality PTFE inner insulation with an exclusive post production process which allows for a faster, clearer beat and a smoother sound, less prone to harshness.
- ✓ Special conducting layer between insulation and screen that prevents microphonic noise, resulting in a smoother, clearer and more dynamic sound quality.
- ✓ Advanced quality control of the direction of wiring during the production process, delivering superior stereo imaging, as well as lower background noise.
- ✓ Terminated with our own high quality hourglass silhouette gold plated RCA Phono plug, ensuring cable is much easier to insert and remove from your system, and performance and reliability of cable is maintained over time due to the design.
- ✓ Cables are twisted together to reduce RFI and give clearer, smoother sound. Directional heat shrinks are applied to the attractive green sheath.
- ✓ Cable manufactured in England, ensuring that we have close, face-to-face contact with the manufacturing and production facilities, and also shows that we support and are proud of British manufacturing.
- ✓ Available terminated as a stereo RCA pair, digital/subwoofer or 3.5mm – 2 Phono “musiclink” cable.
